Greetings,

~The Institute of Constitutional and Parliamentary Studies (ICPS) is organizing "From Budgeting to Investing: Comprehensive Financial Management Workshop on April 10, 2024 from 11 :00 AM to 01 :00 PM in online mode.

~ Personal financial management refers to the process of effectively managing one's financial resources to achieve financial goals and maintain financial stability. Its significance cannot be overstated, as it impacts various aspects of an individual's life, including their overall well-being, opportunities for growth, and ability to navigate financial challenges.

~The aim of the workshop will be to promote financial literacy, instill responsible behavior, and empower informed decision-making. The workshop will be focused on students as these financial responsibilities are new to them and very few are well aware of effective methods to manage their finances. Ultimately, the goal is to set students on a path toward financial independence.

~The workshop will be led by professionals who will share their expertise and experience with the participants. The link for joining the workshop will be sent to registered students through their mail id.

~A certificate of participation will be provided.
