31st July-3rd August 2019

Venue: Kalam Centre, King George's Medical University, Lucknow-226003

Bite Marks & Lip Marks in Child Abuse

A workshop by:

Dr. Amer Alsarakibi
Forensic Odontologist
Syrian board of forensic
Medicine,
Syria

Dr. Ibrahim Eid
Expert,
International Arbitration Of
Disputes and Criminal Legal,
Egypt

About the Workshop

Bite mark analysis plays an important role in personal identification in forensic odontology. They are commonly seen in violent crimes such as sexual assaults, homicides, child abuse, etc. Human bites are common on the face and are usually seen on prominent locations of the face such as the ears, nose and lips. Individual characteristics recorded in the bite marks such as fractures, rotations, attrition, and congenital malformations are helpful in identifying the individual who caused it. We are reporting the case of a 55-year-old lady with bite marks on her left ear, who was allegedly assaulted by the suspect. On the basis of characteristic features of the suspect's dentition, it was concluded that the bite marks seen on the victim was most probably caused by the suspect

The external surface of lips has many elevations and depressions forming a characteristic pattern called lip prints, examination of which is known as cheiloscopy. The lip prints are unique and distinguishable for every individual like fingerprints. The use of lip prints for human identification was first suggested in 1950 and researches were carried out in 1960s and early 1970s, resuming in the last few years. The present study was aimed to study the lip prints of different individuals in different parts of the lip and find out the incidence of any particular pattern in the given age group. Although lip prints identification has been utilized in the court in isolated cases, more researches need to be conducted in this field with regards to confirmation of uniqueness, and the collection and interpretation of evidence.

1. Registration Fee: INR 2000
2. Seats : limited seats 40
3. Wednesday, 31st July 2019

Registration forms and brochure can be downloaded from :
