

BDS SYLLABUS

ORAL MEDICINE AND RADIOLOGY

AIMS :

- (1) To train the students to diagnose the common disorders of Orofacial region by clinical examination and with the help of such investigations as may be required and medical management of oro-facial disorders with drugs and physical agents.
- (2) To train the students about the importance, role, use and techniques radiographs / digital radiograph and other imaging methods in diagnosis.
- (3) The principles of the clinical and radiographic aspects of Forensic Odontology.

The syllabus in ORAL MEDICINE & RADIOLOGY is divided into two main parts

- (I) Diagnosis, Diagnostic methods and Oral Medicine
 - (A) Diagnostic methods
 - (B) Diagnosis and differential diagnosis
 - (C) Oral Medicine & Therapeutics.
- ii) Oral Radiology

COURSE CONTENT

- (1) Emphasis should be laid on oral manifestations of systemic diseases and ill-effects oral sepsis on general health.
- (2) To avoid confusion regarding which lesion and to what extent the student should learn and know, this elaborate syllabus is prepared. As certain lesions come under more than one group, there is repetition.

Part - I ORAL MEDICINE AND DIAGNOSTIC AIDS

SECTION (A) - DIAGNOSTIC METHODS

- (1) Definition and importance of Diagnosis and various types of diagnosis.
- (2) Method of clinical examinations.
 - (a) General Physical examination by inspection.
 - (b) Oro-facial region by inspection, palpation and other means.
 - (c) To train the students about the importance, role, use of saliva and techniques diagnosis of saliva as part of oral disease
 - (d) Examination of lesions like swellings, ulcers, erosions, sinus, fistula, growth pigmented lesions, white and red patches.
 - (e) Examination of lymph nodes
 - (f) Forensic examination - Procedures for post-mortem dental examination; maintaining dental records and their use in dental practice and post-mortem identification; jurisprudence and ethics.
- (3) Investigations
 - (a) Biopsy and exfoliative cytology
 - (b) Hematological, Microbiological and other tests and investigations necessary for diagnosis and prognosis.

SECTION (B) - DIAGNOSIS, DIFFERENTIAL DIAGNOSIS

While learning the following chapters, emphasis shall be given only on diagnostic aspects including differential diagnosis

- (1) Teeth : Developmental abnormalities, causes of destruction of teeth and their sequelae and discoloration of teeth
- (2) Diseases of bone and Osteodystrophies : Development disorders: Anomalies, Exostosis and tori, infantile cortical hyperostosis, osteogenesis imperfecta. Marfans syndrome, osteopetrosis. Inflammation - Injury, infection and spread of infection fascial space

infections osteoradionecrosis. metabolic disorders - Histiocytosis

Endocrine - Acro - megalia and hyperparathyroidism

Miscellaneous - Paget's disease, Mono and polyostotic fibrous dysplasia, Cherubism.

(3) Temporomandibular joint : Developmental abnormalities of the condyle. Rheumatoid arthritis, Osteoarthritis, Sub-luxation and luxation.

(4) Common cysts and Tumours:

CYSTS: Cysts of soft tissue : Mucocele and Ranula

Cysts of bone : Odontogenic and nonodontogenic

TUMORS :

Soft Tissue:

Epithelial: Papilloma, Carcinoma, Melanoma

Connective tissue : Fibroma, Lipoma, Fibrosarcoma

Vascular : Haemangioma, Lymphangioma

Nerve Tissue : Neurofibroma, Traumatic Nueroma, Neurofibromatosis

Salivary Glands ; Pleomorphic adenoma, Adenocarcinoma, Warthin's Tumour,

Adenoid Cystic carcinoma.

Hard Tissue :

Non Odontogenic : Osteoma, Osteosarcoma, Osteoclastoma,

Chondroma, Chandrosacroma,

Central giant cell tumor, and Central haemangioma

Odontogenic : Enameloma, Ameloblastoma, Calcifying Epithelial Odontogenic tumor,

Adenomatoid Odontogenic tumor, Periapical cemental dysplasia and odontomas

(5) Periodontal diseases: Gingival hyperplasia, gingivitis, periodontitis, pyogenic granuloma

(6) Granulomatous diseases : Tuberculosis, Sarcoidosis, Midline lethal granuloma crohn's

Disease and Histiocytosis X

(7) Miscellaneous Disorders : Burkitt lymphoma, sturge - Weber syndrome, CREST syndrome, rendu-osler-weber disease.

SECTION (C) : ORAL MEDICINE AND THERAPEUTICS.

The following chapters shall be studied in detail including the eiology, pathogenerals, clinical features, investigations, differential diagnosis, management and prevention.

(1) Infections of oral and paraoral structures:

Bacterial : Streptococcal, tuberculosis, syphills,

vincents, leprosy, actinomycosis, diphtheria and tetanus

Fungal : Candida albicans

Virus : Herpes simplex, herpes zoster, ramsay hunt syndrome measles, herpangina

mumps, infectious mononucleosis, AIDS and hepatitis B

(2) Important common mucosal lesions :

White lesions : Chemical burns, leukodema, leukoplakia, Fordyce spots, stomatitis nicotina palatinus, white sponge nevus, candidiasis, licherplanus, discoid lupus erythematosis

Veiculo-bullous lesions : Herpes simplex herpes zoster herpangina, bullous lichen planus, pemphigus, cicatricial pemphigoid erythema multiforme.

Ulcers : Acute and chronic ulcers

Pigmented lesions : Exogenous and endogenous

Red lesions : Eruthroplakia, Stomatitis venenata and medicamentosa, erosive, lesions and denture sore mouth

Cervico-facial lymphadenopathy

Facial Pain :

(i) Organic pain : pain arising from the diseases of orofacial tissues like teeth, pulp, gingival, periodontal tissue, mucosa, tongue, muscles, blood vessels, lymph tissue, bone, paranasal sinus, salivary glands etc.

(ii) Pain arising due to C.N.S. diseases:

- (a) Pain due to intracranial and extracranial involvement of cranial nerves (Multiple sclerosis, cerebrovascular disease troter's syndrome etc.)
- (b) Neuralgic pain due to unknown causes : Trigeminal neuralgia, glossopharyngeal neuralgia, sphenopalatine ganglion neuralgia, periodic migrainous neuralgia and atypical facial pain.
- (iii) Referred pain : Pain arising from distant tissues like heart, spine etc.,
- (3) Altered sensations : Cacogeusia halitosis.
- (4) Tongue in local and systemic disorders : (Aglossia, ankyloglossia, bifid tongue, fissured tongue, scrotal tongue, macroglossia, microglossia, geographic tongue, median rhomboid glossitis, depapillation of tongue, hairy tongue, atrophic tongue, reactive lymphoid hyperplasia, glossodynia, glossopyrosis, ulcers, white and red patches etc.)
- (5) Oral manifestations of :
 - (i) Metabolic disorders :
 - (a) Porphyria
 - (b) Haemochromatosis
 - (c) Histocytosis X diseases
 - (ii) Endocrine disorders:
 - (a) Pituitary : Gigantism, acromegaly, hypopituitism
 - (b) Adrenal cortex : Addison's disease (Hypofunction) Cushing's syndrome)
 - (c) Parathyroid glands : Hyperparathyroidism.
 - (d) Thyroid gland : (Hypothyroidism) Cretinism, myxedema
 - (e) Pancreas : diabetes
 - (iii) Nutritional deficiency : vitamins : riboflavin, nicotinic acid, folic acid vitamin B12, vitamin C (Scurvy)
 - (iv) Blood disorders :
 - (a) Red blood cell diseases Deficiency anemias : (Iron deficiency, plummer – Vinson

syndrome, pernicious anemia) Haemolytic anemias : (Thalassemia, sickle cell anemia, erythroblastosis fetalis) Aplastic anemia Polycythemia

(b) White blood cell diseases Neutropenia, cyclic neutropenia, agranulocytosis, infectious mononeucleosis and leukemias

(c) Haemorrhagic disorders : Thrombocytopenia, purpura, hemophilia, Christmas

(d) disease and von Willebrand's disease

(6) Disease of salivary glands :

(i) Development disturbances : Aplasia, atresia and aberration

(ii) Functional disturbances : Xerostomia, ptyalism

(iii) Inflammatory conditions : Nonspecific sialadenitis, mumps, sarcoidosis

Heerfordt's syndrome (Uveoparotid fever), Necrotising sialometaplasia

(iv) Cysts and tumors : Mucocele, ranula, pleomorphic adenoma, mucoepidermoid carcinoma

(v) Miscellaneous : sialolithiasis, Sjogren's syndrome, Mikulicz's disease and sialosis

(7) Dermatological diseases with oral manifestations :

(a) Ectodermal dysplasia

(b) Hyperkeratosis palmarplantaris with periodontopathy

(c) Scleroderma

(d) Lichen planus including Gianotti's syndrome

(e) Lupus erythematosus

(f) Pemphigus

(g) Erythema multiforme

(h) Psoriasis

(8) Immunological diseases with oral manifestations

(a) Leukemia

(b) Lymphomas

(c) Multiple myeloma

- (d) AIDS clinical manifestations, opportunistic infections, neoplasms
- (e) Thrombocytopenia
- (f) Lupus erythematosus (
- g) Scleroderma
- (h) dermatomyositis
- (I) Submucous fibrosis
- (j) Rheumatoid arthritis
- (k) Recurrent oral ulcerations including Behçet's syndrome and Reiter's syndrome
- (9) Allergy : Local allergic reactions' anaphylaxis, serum sickness (local and systemic allergic manifestations to food drugs and chemicals)
- (10) Foci of oral infection and their ill effects on general health
- (11) Management of dental problems in medically compromised persons :
 - (i) Physiological changes : Puberty, Pregnancy and menopause
 - (ii) The patients suffering with cardiac, respiratory, liver, kidney and bleeding disorders, hypertension, diabetes and AIDS. Post-irradiated patients.
- (12) Precancerous lesions and conditions
- (13) Nerve and muscle diseases :
 - (i) Nerves : (a) Neuropraxia (b) Neurotmesis (c) Neuritis (d) Facial nerve paralysis including Bell's palsy, Heerfordt's syndrome, Melkersson Rosenthal syndrome and Ramsay Hunt syndrome (e) Neuroma (f) Neurofibromatosis (g) Frey's syndrome
 - (ii) Muscles : (a) Myositis ossificans (b) Myofascial pain dysfunction syndrome (c) Trismus
- (14) Forensic Odontology:
 - (a) Medicolegal aspects of orofacial injuries
 - (b) Identification of bite marks

- (c) Determination of age and sex
- (d) Identification of cadavers by dental appliances, Restorations and tissue remanants viz., antibiotics, chemotherapeutic agents, anti-inflammatory and analgesic drugs, astringents, mouth washes, styptics, demelucents, local surface anaesthetic, sialogogues, antisialogogues and drugs used in the treatment of malignancy.

Part - II BEHAVIOURAL SCIENCES AND ETHICS.

Part - III ORAL RADIOLOGY

- (1) Scope of the subject and history of origin
- (2) Physics of radiation : (a) Nature and types of radiations (b) source of radiations
 - (c) Production of X-rays (d) Properties of X-rays (e) Compton effect (f) Photoelectric effect
 - (g) Radiation measuring units
- (3) Biological effects of radiation
- (4) Radiation safety and protection measures
- (5) Principles of image production
- (6) Radiographic techniques:
 - (i) Intra-Oral : (a) Periapical radiographs (Bisecting and parallel techniques) (b) Bite wing radiographs (c) Occlusal radiographs
 - (ii) Extra - Oral : (a) Laternal projections of skull and jaw bones and paranasal sinuses (c) Cephalograms (d) Orthopantomograph (e) Projections of temporomandibular joint and condyle of mandible (f) Projections for Zygomatic arches
 - (iii) Specilised techniques : (a) Sialography (b) Xeroradiography (c) Tomography
- (7) Factors in production of good radiographs :
 - (a) K.V.P. and MA of X-ray machine (b) Filters (c) Collimations (d) Intensifying screens
 - (e) Grids (f) X-ray films (g) Exposure time (h) Techniques (i) Dark room (j) Developer

and fixer solutions (k) Film processing

(8) Radiographic normal anatomical landmarks

(9) Faculty radiographs and artefacts in radiographs

(10) Interpretation of radiographs in various abnormalities of teeth, bones and other orofacial

tissues

(11) Principles of radiotherapy of oro-facial malignancies and complications of radiotherapy

(12) Contrast radiography and basic knowledge of radio-active isotopes

(13) Radiography in Forensic Odontology - Radiographic age estimation and post-mortem radiographic methods.

PRACTICALS / CLINICALS

1. Student is trained to arrive at proper diagnosis by following a scientific and systematic procedure of history taking and examination of the orofacial region. Training is also imparted in management wherever possible. Training also shall be imparted on saliva diagnostic procedures. Training also shall be imparted in various radiographic procedures and interpretation of radiographs.

2. In view of the above each student shall maintain a record of work done, which shall be evaluated for marks at the time of University examination.

1. The following is the minimum of prescribed work for recording
In the Third Year B.D.S.:-

A) Routine OPD diagnosis.....150
B) IOPA Radiographs to be taken..... 75

In the IV B.D.S. :-

(a) Recording of detailed case histories of interesting cases.....10

(b) Intra-oral radiographs Interpretation (Periapical, bitewing, occlusal).....25

(c) Seminars and Tutorials

(d) Saliva diagnostic check as routine procedure.
