2023	Facilitating continuous capacity building of health care providers	KGMU and Jhpiego Corporation	King George's Medical University, Lucknow and Jhpiego signed MoU to foster the public health research capacity building and digital intervention in Uttar Pradesh On September 13th, 2022, a Memorandum of Understanding (MoU) was signed between King George's Medical University, Lucknow and Jhpiego, John Hopkins University Affiliate. This initiates an effective partnership between the two institutions towards fostering the public health research capacity building and digital intervention in Uttar Pradesh. Key areas that will be supported through this partnership between the two institutions include strengthening telemedicine service delivery and bolstering the digital health space through the eSanjeevani platform. Apart from this, the institutions will also work towards improving the capacities of healthcare service delivery staff across the health system in the state. This effort will also have a focus on strengthening the Nursing Cadre Services. The MoU also laid the foundations for establishing a centre for excellence in oral health, mental health, elderly and palliative care, ENT and ophthalmic care,

			and emergency and trauma care. Other areas of collaboration will include primary healthcare services, women's cancers, and non-communicable diseases. The institutions will also jointly undertake scientific research to gain insights into the current health challenges that are present in the state and drive evidence-based action towards developing solutions for the same. @MoHFW_INDIA
2023	To Facilitate procurement of life-saving medical devices for underprivileged cancer patients	MOU Department of Surgical Oncology KGMU and Power Finance Corporation Limited	The MoU was formally executed on 03.07.2023 . Under the terms of this MoU, PFC has committed to providing financial assistance amounting to about Rs. 10.19 crore to KGMU. This substantial funding will be allocated to support the procurement of essential medical devices that are crucial for the effective treatment and care of underprivileged cancer patients. The collaboration between PFC and KGMU holds a great significance as it underscores joint commitment of these two institutions to address the healthcare needs of the underprivileged population afflicted by cancer. The financial assistance provided by PFC will go a long way in enabling KGMU to acquire essential medical devices, thereby ensuring that underprivileged cancer patients receive the necessary treatments and interventions to improve their chances of recovery.

		Health,KGMU and ECHO Trust India	objective of the project was to strengthen the capacity of primary healthcare providers across Uttar Pradesh through structured refresher trainings using the ECHO model. Under the leadership of Dr. Shivendra Kumar Singh, Nodal Officer-ECHO KGMU, Hub & Professor, Dept. of Community Medicine & Public Health, the project facilitated knowledge dissemination and capacity building among Medical Officers (MOs) and Community Health Officers (CHOs). Various training session has been conducted under the guidance and support of Medical College faculty, these sessions focused on a wide range of crucial public health topics. The training curriculum covered areas including Non-Communicable Diseases (NCDs), Maternal Health, Child Health, Oral Health, and other essential healthcare services. By utilizing the ECHO model, which leverages tele mentoring and case-based learning, the project enabled continuous professional development and knowledge sharing between specialists and frontline healthcare providers. This approach helped in improving service delivery, early diagnosis, and better management of common and complex health conditions at the primary care level.
