Name of the elective	Duration	Brief description of elective	Number of students enrolled
Sexually Transmitted Infections	4 weeks	A patient often reaches a health care facility with a group of symptoms termed as a syndrome. Taking the example of sexually transmitted infections, this elective is designed to give a hands-on experience to medical students on syndromic approach of infectious diseases, which will be of immense help during their clinical practice. This will highlight the importance of inter-disciplinary coordination for diagnosis of infectious diseases including good sampling techniques, the laboratory component and appropriate correlation of laboratory results with the clinical scenario. This will also give an idea to the learners of how a Microbiology laboratory functions following good laboratory practices, the various techniques that are used in diagnosis of infectious diseases and the different platforms through which reports can be dispatched or accessed. The learner may also develop an interest in Microbiology to choose later as a career option.	10
HIV Medicine; Laboratory Track	4 weeks	To control or eliminate infectious diseases of public health importance, the Government of India runs several national programs such as the National HIV Control Program, the National Tuberculosis Elimination Program, the Hepatitis Control Program etc. This elective aims as providing a holistic approach of functioning of such national programs to the undergraduate students. The learner will experience how development of the cognitive, psychomotor and affective domains is essential for working in especially sensitive areas like HIV. Training of doctors in the field of HIV is need of the hour looking at the alarming rise in the number of cases and	10

Department of Microbiology

The Department of Microbiology at KGMU stands as a beacon of excellence, showcasing a multifaceted commitment to academic prowess, patient care, cutting-edge research, and impactful extension initiatives. Over the years, the department has garnered numerous accolades, solidifying its position as a leader in the field.

The Department of Microbiology at KGMU offers a diverse range of elective courses for undergraduate and postgraduate students, enhancing their practical skills and interdisciplinary understanding. These four-week courses, including topics such as Sexually Transmitted Infections, HIV Medicine, Mycobacteriology, Viral Hepatitis, and Dermatophyte Infections, provide hands-on experiences in diagnosing infectious diseases. Emphasizing inter-disciplinary coordination and good laboratory practices, these electives not only contribute to clinical proficiency but also inspire future career choices in microbiology and infectious diseases. Each course, accommodating 10 students, reflects the department's commitment to holistic education and the preparation of healthcare professionals for the challenges of public health. The department has successfully integrated

AAA 2022-2023 Department of Microbiology

value-added courses into the existing curriculum, providing students with specialized training in Health Infection & Control (HICC), Central Sterile Supply Department (CSSD), and mentorship programs for both undergraduate (UG) and postgraduate (PG) students. These initiatives enhance the educational experience and skill development of participants. We introduced innovative methods of teaching and learning, including the Flipped Classroom Model, Project-Based Learning (PBL), Gamification, Virtual and Augmented Reality (VR/AR), Adaptive Learning Platforms, Peer Assessment, and Interactive Whiteboards. These approaches aim to enhance student engagement, foster critical thinking, and provide a dynamic and interactive learning environment. The Department has successfully initiated new teaching programs under the revised NMC curriculum. We have adopted measurable criteria for student assessment. It employs standardized test scores, class assessments, and teacher evaluations to identify low performers and advanced learners. Department of Microbiology is equipped with a Clinical Skills Laboratory and Simulation-Based Learning facility for both undergraduate and postgraduate students. Structured programs are conducted for student training and assessment, ensuring comprehensive skill development.

Faculty members from the Department of Microbiology have received prestigious awards and recognitions, including the Vishwa Gaurav Samman, Stanford University's 2% Global Scientists acknowledgment, Fellow of the Indian Association of Biological Sciences, Covid Warrior Award, UP Today Milestone Achievers Award, TED TALK recognition, Infection Prevention & Control Olympiad-2022, Certificate of Appreciation for Community Extension Activities, Health Hero Award and Best Laboratory of KGMU 2022. These accolades span national and international spheres, reflecting the faculty's outstanding contributions in their respective fields.

The Department of Microbiology at KGMU hosts several long-term collaborative projects, reinforcing its commitment to cutting-edge research and diagnostics. Reference Laboratories and Research Centers for Viral diseases, Tuberculosis, HIV and ICTC lab, Bacterial & Fungal Diseases holds the esteemed status supported by ICMR, DHR, NHM, WHO, CDC, etc. Pioneering initiatives, including the Virus Research and Diagnostic Laboratory (PM ABHIM), mark the department as one of the first four in India. Additionally, the department actively contributes to national efforts through projects such as Capacity Building for Hospital Infection Control, Antimicrobial Resistance Surveillance, the National Viral Hepatitis Control Program, and the establishment of a network of research laboratories for epidemic and calamity management. These endeavours position the department as a key player in long-term public health initiatives, addressing critical challenges in infectious diseases and health surveillance.

AAA 2022-2023 Department of Microbiology

The department proudly holds 100% concordant EQAS results, a testament to its unwavering commitment to precision and quality. Recognized as the Best Department for three consecutive years (2020-2022) at KGMU, the department consistently sets the standard for excellence. Achieving accreditation under NABL-ISO 15189:2012 underscores the department's dedication to maintaining the highest standards in laboratory practices. Participation and outstanding results in External Quality Assurance Programs with prestigious institutions such as IAMM, NIV Pune, CMC Vellore, and PGI Chandigarh highlight the department's commitment to excellence. The department's outreach programs extend beyond traditional realms, actively engaging with communities to enhance health awareness and empower the underserved. Two faculty members consecutively featured among the Top 2% Global Scientists by Stanford University, USA, attest to the department's international impact. Securing research grants in form of various projects reflects the department's prowess in advancing the frontiers of scientific knowledge. With over 40 research publications annually, two published books, and a dedicated annual newsletter, the department consistently contributes to the academic literature. Active participation in the Annual KGMU Infection Control & Prevention Manual and handling a substantial patient load showcases the department's commitment to patient well-being. The department's involvement in a myriad of extracurricular activities, including workshops, seminars, and publications, reflects a holistic approach to education and engagement.

In summary, the Department of Microbiology at KGMU stands at the forefront of academic and healthcare excellence, embodying a commitment to quality, innovation, and community impact.

Organizes special programs for slow learners

Each student is different and requires a tailored approach to optimise their learning process. In order to identify slow learners and offer remedial measures, following facilities are offered to the students at Ophthalmology department for MBBS students.

1. Continuous formative assessment with feedback to students attending OPDs/lectures and long clinics.
2. Evening teaching program in Ophthalmology with special attention to slow learners.

AAA 2022-2023 Department of Ophthalmology

3. The personal email ID of faculty is shared with the student to answer any query or provide personalised guidance.
4. Students attending ward postings are given opportunity to present clinical cases to enhance their learning. Additional opportunities to present cases are provided to slow learners.
5. Ward leaving assessment is done for each student to identify slow learners and extra evening teaching is provided to them.
6. Additional 'Revision Lectures' are included in the teaching schedule to aid learning of complex concepts.
