CYTOGENETICS LAB-

The Cytogenetics Laboratory of the department is currently utilized by postgraduate students as a research laboratory. As Chromosome abnormalities account for a large proportion of patients with congenital malformations, intellectual disability, and infertility or recurrent pregnancy loss for which cytogenetic testing plays a key role. Chromosome analysis for prenatal samples, peripheral blood, bone marrow, lymphomas and solid tumors is done by karyotyping for research purpose in the lab. In the last five years, 5 postgraduate thesis has been done in the lab on cytogenetics.

DISSECTION HALL -

Department of Anatomy has a spacious Dissection hall which can accommodate approximately 300 students at a time. It is a place where MBBS, BDS, Nursing, Paramedics and MD (Anatomy) students dissect human cadaver to learn different parts of the human body. Prosected parts are also demonstrated to the students for learning purposes. To assess the dissecting skills of the students each year S S Khan Dissection Competition is organized where students take part very enthusiastically.

HISTOLOGY LABS -

In the department of Anatomy there are two histology laboratories: Undergraduate histology lab and Postgraduate histology lab. In undergraduate histology lab, we show the Histological slides to MBBS, BDS and MD students. In Postgraduate histology lab, we make the Histological slides for the purpose of teaching to undergraduates as well as for postgraduate students. PG students who show interest for research in microscopic anatomy, make histological slides and do their observations in the lab after proper training of histological techniques under expert guidance.

USG LAB -

Department of Anatomy has an Ultrasound laboratory. Currently, the Ultrasound lab is being utilised as a PG research laboratory for our postgraduate students. PG students who opt for research in sonographic anatomy, work in the lab under guidance and supervision.

In future, the Ultrasound lab will also be utilised for regular MBBS teaching training for conducting the electives as per the CBME curriculum. The Sonographic anatomy elective module has already been prepared and sent to the Department of Medical education, KGMU.
